

Purpose:

- Execute Game logic (ex. choosing a sequence length, displaying sequence, taking user input, informing if a guess was correct or not, logging responses)
- Displaying menus (main screen, game, log and summary)
- While they aren't a part of the MainActivity() object, MainScreen(modifier: Modifier, game: Game) and AttemptRow(attempt: Attempt) are the composable functions used to display the game

Purpose:

- Attempt Class ensures that each attempt is recorded in a standardized manner
